2024 PLM Components Innovation Conference

It's where Siemens comes together with customers, partners and analysts to explore the wide range of applications and opportunities for our open portfolio of PLM Components to assure success for our software vendor ecosystem and its end-users.

Key conference objectives:

Learn how established software vendors and start-ups use PLM Components to deliver leading solutions

Discover innovation in design, manufacturing, simulation, robotics, cloud/mobile, and interoperability

Network with an outstanding line-up of industry experts, CxOs and product development leaders

2 Days

Technical content, professional networking and Siemens' hospitality

27 Sessions

Product direction, customer success and industry/technology trends

150 Attendees

Product and industry experts, customers, partners & analysts

Register today

Why attend

Key topics

🔒 Openness

🤝 Partnership

◆◆ Digitalization

📦 New 3D data models

Ai Artificial intelligence

◎ Sustainability

☁ Cloud/mobile

🥽 Collaboration/Metaverse

Customer success stories

Learn how software vendors across design, manufacturing and simulation create value with PLM Components

Industry trends

Discover how our industry embraces trends like AI, digitalization, sustainability, cloud and metaverse

Insights and best practices

Learn from PLM Components product experts and customers about optimizing solution implementation

Meet product and business experts

Discuss your applications and business goals for PLM Components with our experts

Product news and updates

Hear about the latest PLM Components product updates and development direction

Professional networking

Network with an outstanding line-up of industry and product experts throughout the conference
