

Teamcenter for SolidWorks

A better PDM solution that can grow to PLM

Business challenges demand PDM

Global design and manufacturing	More complex products	Cumbersome systems and processes

Keys to success

Quick and efficient deployment	PDM that can grow as you grow	Expert service and support

Why Teamcenter inside SolidWorks is better for SolidWorks designers

Easily find, share, re-use	Easy BOM management	Easy configuration/variant management	Integrated change processes
<ul style="list-style-type: none"> Save locally, share globally, with Teamcenter inside SolidWorks View and markup files from any MCAD source Update assemblies with a single click Easily find, view, print 	<ul style="list-style-type: none"> Directly access and edit the bill of material (BOM) inside SolidWorks Add non-SolidWorks items Fully control the BOM 	<ul style="list-style-type: none"> Configure and load assemblies with business-driven logic inside SolidWorks Retrieve assemblies in any released or work-in-process state, not just as-saved or latest 	<ul style="list-style-type: none"> Access engineering change orders directly, inside SolidWorks Integrated Word and Excel Ready-to-use and customizable process templates Assign and approve tasks electronically

Why Teamcenter is better for the business

Easy web access across the business	Visual access to product designs	Collaborate across extended design teams
<ul style="list-style-type: none"> Any user, anywhere, any device Familiar online search with filtering Personalized user experience 	<ul style="list-style-type: none"> Universal viewing, regardless of MCAD source View, interrogate, mark up Use markups in design reviews or change processes 	<ul style="list-style-type: none"> Navigate and manage files from diverse mechanical, electronic, and electrical CAD sources Easy to use for a small local team, with power to manage thousands globally
Multi-CAD, cross-domain BOM management	Global design and document control	
<ul style="list-style-type: none"> Integrate with MCAD, PCB, wire harness design Create BOMs with mechanical, electrical, and electronic components Integrate with ERP 	<ul style="list-style-type: none"> Secure your intellectual property Change documents without download Security and scalability for growth 	

Teamcenter® is the world's most widely used PDM software that you can deploy in as little as one week!
