

Medsoto Tool Checker

1 Overview

The Medsoto Tool Checker is used to check the functionality of variables, which are available through Polaron or Extensions.

Medsoto Tool Checker

1: Variables

Document \$document	❌ Document not found. Available in Wiki Content Blocks.
Me \$me	✅ Me found. Available in Velocity context only.
Page \$page	✅ Page found.
Page Parameters \$pageParameters	✅ Page Parameters found.
Plan \$plan	❌ Plan not found. Available in TestPlan wiki pages.
Request \$request	✅ Request found.
Test Run \$testRun	❌ Test Run not found. Available in TestRun wiki pages.
Checked:	🔍 7
Found:	✅ 4
Not found:	❌ 3

2: Standard

Calendar Tool \$calendarTool	✅ Calendar Tool found.
Platform Service \$platformService	✅ PlatformService found.
Project Service \$projectService	✅ Project Service found.
Security Service \$securityService	✅ Security Service found.
Test Management Service \$testManagementService	✅ Test Management Service found.
Tracker Service \$trackerService	✅ Tracker Service found.

3: Derived

Data Service \$dataService	✅ Data Service found. Requested via the tracker service.
Documents Manager \$documentsManager	✅ Documents Manager found. Requested via the tracker service.
Export Manager \$exportManager	✅ Export Manager found. Requested via the tracker service.
Folder Manager \$folderManager	✅ Folder Manager found. Requested via the tracker service.
Import Manager \$importManager	✅ Import Manager found. Requested via the tracker service.
Module Manager \$moduleManager	✅ Module Manager found. Requested via the tracker service.
Planning Manager \$planningManager	✅ Planning Manager found. Requested via the tracker service.
Project Service \$projectService	✅ Project Service found. Requested via the tracker service.
RichPage Manager \$richPageManager	✅ RichPage Manager found. Requested via the tracker service.
Saved Queries Manager \$savedQueriesManager	✅ Saved Queries Manager found. Requested via the tracker service.
Time Points Manager \$timePointsManager	✅ Time Points Manager found.

4: Extension

Alternator Tool \$alternatorTool	✅ Alternator Tool found.
Comparison Date Tool \$dateTool	✅ Comparison Date Tool found.
Escape Tool \$escapeTool	✅ Escape Tool found.
Iterator Tool \$iteratorTool	✅ Iterator Tool found.
List Tool \$listTool	✅ List Tool found.
Math Tool \$mathTool	✅ Math Tool found.
Number Tool \$numberTool	✅ Number Tool found.
Object Factory \$objectFactory	✅ Object Factory found.
Polarion Tool \$polarionTool	✅ Polarion Tool found.
Render Tool \$renderTool	✅ Render Tool found.
Resource Tool \$resourceTool	✅ Resource Tool found.
Sort Tool \$sortTool	✅ Sort Tool found.
Value Parser \$valueParser	✅ Value Parser found.
Browser Tool \$browser	❌ Browser Tool not found.
Class Tool \$classTool	❌ Class Tool not found.
Class Utils \$classUtils	❌ Class Utils not found.

2 Installation

How to install the Medsoto Tool Checker in your project:

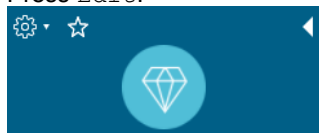

- Create a new Classic Wiki Page.
- At the top of the page, press **Expand Tools**.

THIS PAGE HAS NO CONTENT YET.
YOU CAN CREATE AND SAVE CONTENT NOW USING THIS EDITOR

Created: 2020-12-10 16:54, Updated: 2020-12-10 16:54

- Press **Edit**.

THIS PAGE HAS NO CONTENT YET.
YOU CAN CREATE AND SAVE CONTENT NOW USING THIS EDITOR

Created: 2020-12-10 16:54, Updated: 2020-12-10 16:54

4. Replace the content of the page with the content of the File `MedsotoToolChecker.wiki.txt`, then press Save & Close.

The screenshot shows the Medsoto Tool Checker interface. At the top, there is a toolbar with buttons for 'Save', 'Save & Close' (highlighted with a red box and a red circle with the number 2), 'Cancel', 'Wiki Markup', 'Rich Text', and 'Preview'. Below the toolbar is a text editor area with a red border and a red circle with the number 1. The text editor contains the following content:

```
##
## Tool Checker
## Use as a wiki page.
##
=====
##
#macro( _tc_prepareAdditionalTools )
  ## Tracker service
  #set( $dataService = false )
  #set( $dataService = $!trackerService.getDataService() )
  #set( $projectService = false )
  #set( $projectService = $!trackerService.getProjectsService() )
  #set( $documentsManager = false )
  #set( $documentsManager = $!trackerService.getDocumentsManager() )
  #set( $moduleManager = false )
```

To the right of the text editor is a sidebar titled 'Wiki Syntax Help'. It contains a 'Headings' section with a table showing the hierarchy of headings: '1 Heading 1', '1.1 Heading 2', and '1.1.1 Heading 3'. Below this is an 'Emphasizing' section.
