

Santa's Hat As Work Item Form Extensions

You will need access to server file system to make it work.

Add Files to Polarion Server

1. Extract santasHat.zip to c:\tmp
2. Copy santasHat.js to [polarionRoot]\scripts
3. Change in santasHat.vm \$serverLocation value to your server address

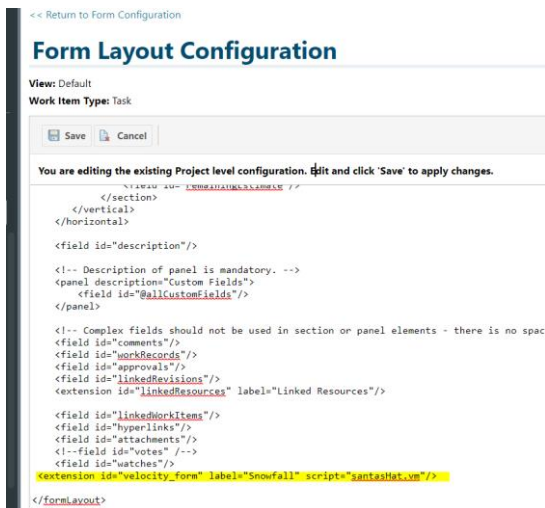

```
#####  
## change the server location to your serverAddress  
##  
#set($serverLocation = "http://127.0.0.1")
```

4. Copy santasHat.png to [polarionRoot]\bundled\apache\htdocs

Add form extensions to a work item type of your choice

Add following code snippet to form configuration (layout)

```
<extension id="velocity_form" label="santas hat" script="santasHat.vm"/>
```

Enjoy 😊
